

Radwan Abdulhadi

Software Developer - Web, Desktop, Mobile, Automation and Developer Tools

Profile

Developer portfolio focused on practical software projects, utilities, automation workflows, responsive web interfaces, Windows tools and learning-oriented repositories.

What I build

Web Development

Responsive portfolios, interfaces, dashboards and full-stack mini projects.

Windows & Desktop

C#/.NET utilities, file-management tools and system-oriented desktop ideas.

Python & Automation

File processing, CLI utilities, task automation and reusable scripts.

Mobile Experiments

Android/Kotlin and Python/Kivy starter projects and interface prototypes.

AI Tools

Small productivity utilities and structured AI-assisted workflows.

Developer Tooling

GitHub labs, reusable components and practical programming experiments.

Core technologies

Python

C#

.NET

JavaScript

HTML

CSS

Git

GitHub

PowerShell

C++

SQL

Android

Kotlin

PHP

IoT

Selected projects

- Smart File Manager - C# / WinUI 3 / .NET
- Robotics Language Lab - Python / C++ / ROS 2
- Python Toolbox - Python / CLI / Automation
- AI Tools Lab - Python / JavaScript / AI
- Windows System Toolkit - PowerShell / C#
